WORK

Backend Development

As a passionate and dedicated student, I have developed my skills in Spring Boot and Node.js, creating robust server-side applications. In Java, I mastered DSA, allowing me to write efficient and optimized code. I have also honed my abilities in web development, creating responsive and interactive websites using React.

Mobile App Development

I have learned mobile app development with Flutter. One of my notable projects involved developing an app aimed at connecting retailers in tier 2 and tier 3 cities in India to facilitate local deliveries, creating a hyper-local delivery network. This experience not only advanced my technical skills but also provided me with solving real-world problems solving skills through technology.

Project Management

Throughout my projects, I learned required strategic planning and daily operational management. In phase of my app project, I coordinated various aspects of the work, from coding and testing to deployment and maintenance to Ground Work (includes connecting retailers). These experiences have equipped me with the necessary skills to manage projects efficiently and deliver innovative solutions.

SKILLS

- Java, JS, Python, Dart
- Flutter, Node.js, Spring Boot, React
- Web Development
- App Development
- UI/UX Design
- Project management
- Creative problem solving
- Communication Skills
- Time Management
