

# Pranav Aggarwal

CS Undergrad at Scaler School of Technology

I'm a developer who loves bringing ideas to life with code. Skilled in Java, JavaScript, Python, and Dart. Great at managing time and always eager to learn something new. I thrive on solving problems and diving into exciting challenges. Let's build something awesome together!

## TECHNICAL SKILLS

Programming Languages: Java, Javascript, Python, Dart

Framework : Flutter, Node, SpringBoot, Next

Libraries : Express.js, Mongoose, React

Version Control : Git, Github

API Development : Postman

## SOFTWARE SKILLS

Data Structures And Algorithms

Mobile App Development

Frontend Web Development

Backend Development

## CERTIFICATES

100xdevs Full Stack Development by Harkirat Singh (11/2023)

100 Days of Code by Angela Yu (02/2024)

## LANGUAGES

- English

Full Professional Proficiency
- Hindi

Full Professional Proficiency
- Punjabi

Full Professional Proficiency

## PERSONAL PROJECTS

- ShopEase (03/2024)
  - Developed ShopEase and about to launch, an app addressing key challenges for shopkeepers and residents in tier-two cities by implementing task scheduling, digital ledger management, real-time shop status updates, and consolidated delivery services. Spearheaded UI development, feature integration, and project planning.
- Teken.ai (07/2024)
  - Developing Teken.ai, a versatile AI system integrating multiple LLM APIs for dynamic chatting and other daily AI tasks. It features a sleek chat interface, a mobile app built with Flutter, a website created with React, and a robust backend using Express and MongoDB. Teken.ai is ready for deployment across various websites, offering a seamless and intelligent user experience.
- Inventory Management System (06/2024)
  - Developed a ready-to-launch Inventory Management System using Next.js and MongoDB . This system streamlines inventory tracking and management, making it easy and intuitive to use.
- ChatBot for Hotel Room Booking (06/2024)
  - Built a friendly ChatBot for hotel room booking using OpenAI, with an Express.js backend, SQLite for storage, and a React frontend. It keeps users secure with JWT authentication with 95% accuracy, making booking easy and enjoyable.
